PROFILE

Accomplished UX designer with a 10 years professional career as interactive designer, with extensive experience in web / mobile design and digital products and services.

My work focuses on the design and optimization of user journeys and digital interfaces, being to improve and simplify the end user experience by creating clear and intuitive designs and proposing innovative solutions.

EMPLOYMENT HISTORY

UX designer, Pure Agency (JOUVE)

Paris

Jun 2019 — Present

IT sector, Service, UX design

As a UX Designer, I worked on projects directly with the Client.

I had the opportunity to participate on very diverse assignments for multiple industries (Media, Retail, Insurance, Energy, Banking, Entertainment, Transport... on B2B, B2C, B2E) and on omnichannel devices.

I led and work with cross-functional and multicultural teams. I was responsible for the creation and delivery of design materials (customer journeys, empathy maps, etc.) across the entire development lifecycle. From discovery, workshops, sprints, up to the testing phases and final delivery. This implied

-Understanding our customers and their end users through research.

-Being collaborative in your approach to design.

Approaching design pragmatically, knowing how to make trade-offs while being aware of their impact.

-Contributing to the evolution of our design system while remaining consistent and aligned with the brand image.

To summarise

#Defined the user experience of web and/or application devices,

#Carried out the interface design of these projects in order to develop the graphics

Adobe Creative Suite

HTML & CSS

Ability to Work in a Team

LANGUAGES

French

English

Spanish; Castilian

Participate in the improvement of our your client's internal creation process.
